OUTDOOR KITCHENS

WWW.IGNEOUSOUTDOORKITCHENS.CO.UK

OUR STORY

Born from a passion for outdoor cooking, Igneous was created to bring the first truly weatherproof outdoor kitchen to life.

With Igneous, you can elevate your outdoor lifestyle and master the art of open-air cooking with a kitchen that's as durable as it is elegant. Designed for all seasons and installed in just one day, it's time to create unforgettable moments, savour every bite, and enjoy the luxury of outdoor living—without compromise.

Picture this – a beautifully crafted outdoor kitchen, the sizzle of the grill, and the laughter of loved ones. It's a lifestyle filled with entertainment, good food and an outdoor space to be proud of.

OUR USP'S

At Igneous, we've developed a unique 'skeleton' framework that enables the use of solid stone as the core material in our outdoor kitchens. This innovative approach ensures exceptional durability and performance, making our kitchens ideally suited for year-round outdoor use.

As passionate advocates of outdoor cooking and entertaining, we identified a clear gap in the market for a truly no-maintenance solution. Our designs are crafted to make outdoor living effortless and enjoyable, allowing you to focus on the experience rather than the clean-up. With surfaces that can be easily cleaned using a jet wash or a simple wipe down, our kitchens offer a hassle-free way to embrace the full potential of outdoor living.

Igneous Outdoor Kitchens are built using premium sintered-stone or granite, not MDF, timber, or carbon steel ensuring full weather resistance and long-lasting outdoor durability.

Enjoy seamless outdoor living with hassle-free installation your Igneous Outdoor Kitchen can be fully set up in just a few hours by our expert fitting team.

Each Outdoor Kitchen is crafted using high-performance materials that are UV stable, scratch-resistant, and stain-resistant delivering a maintenance-free solution built to withstand the elements.

Proudly designed, precision-cut, and expertly crafted in our purpose-built Hampshire factory, every Igneous Outdoor Kitchen is Made in Britain engineered to meet the highest standards for British outdoor living.

Thanks to premium material selection, Igneous Outdoor Kitchens are incredibly easy to clean and maintain, simply jet wash inside and out after entertaining, and your kitchen is ready to use again in minutes.

RUSTIC X PREMIUM

We recognise the importance of versatility in outdoor kitchen design to complement a wide range of patio styles and garden aesthetics. To meet this need, we offer two distinct ranges: Rustic and Premium.

Our Steel Grey Granite range is ideally suited to rustic and rural environments such as cottages, countryside properties, and pub gardens where its natural tones blend seamlessly with the surroundings. Alternatively, the Premium range is designed for contemporary outdoor spaces, offering a refined aesthetic with a broad spectrum of colour options. With over 100 finishes available, this range ensures there is a solution to suit virtually any design scheme.

PAST PROJECTS

I would highly recommend Igneous Outdoor Kitchens. From concept through to installation they were really helpful and professional in their approach. They had loads of advice and suggestions on design and when they came to install they did a fantastic job. The finished project is stunning and Igneous were a major part in the whole project.

Great company to deal with. The bespoke outdoor kitchen/bar the team processed was outstanding, and delivered in only 4 weeks! We would high recommend Igneous Outdoor Kitchens

Shawn & the team from Igneous did a fantastic job with my outdoor kitchen braai (BBQ) area. From discussing what I want in the area, to showing me the various options to the install - cant fault these guys. The Quality and the product is amazing - the entire cabinets are built from granite - no wooden materials used and the stainless steel doors finish it off. 10 stars from me!!

OUR PARTNERS

At Igneous, we collaborate with leading brands in the outdoor appliance industry to ensure our kitchens are paired with high-quality products that enhance both functionality and style. From pizza ovens and barbecues to outdoor fridges, we offer a curated selection of market-leading appliances designed to elevate the outdoor living experience.

In addition, our extensive network within the industry enables us to source a wide range of appliances and accessories, providing tailored solutions to meet your specific project requirements.

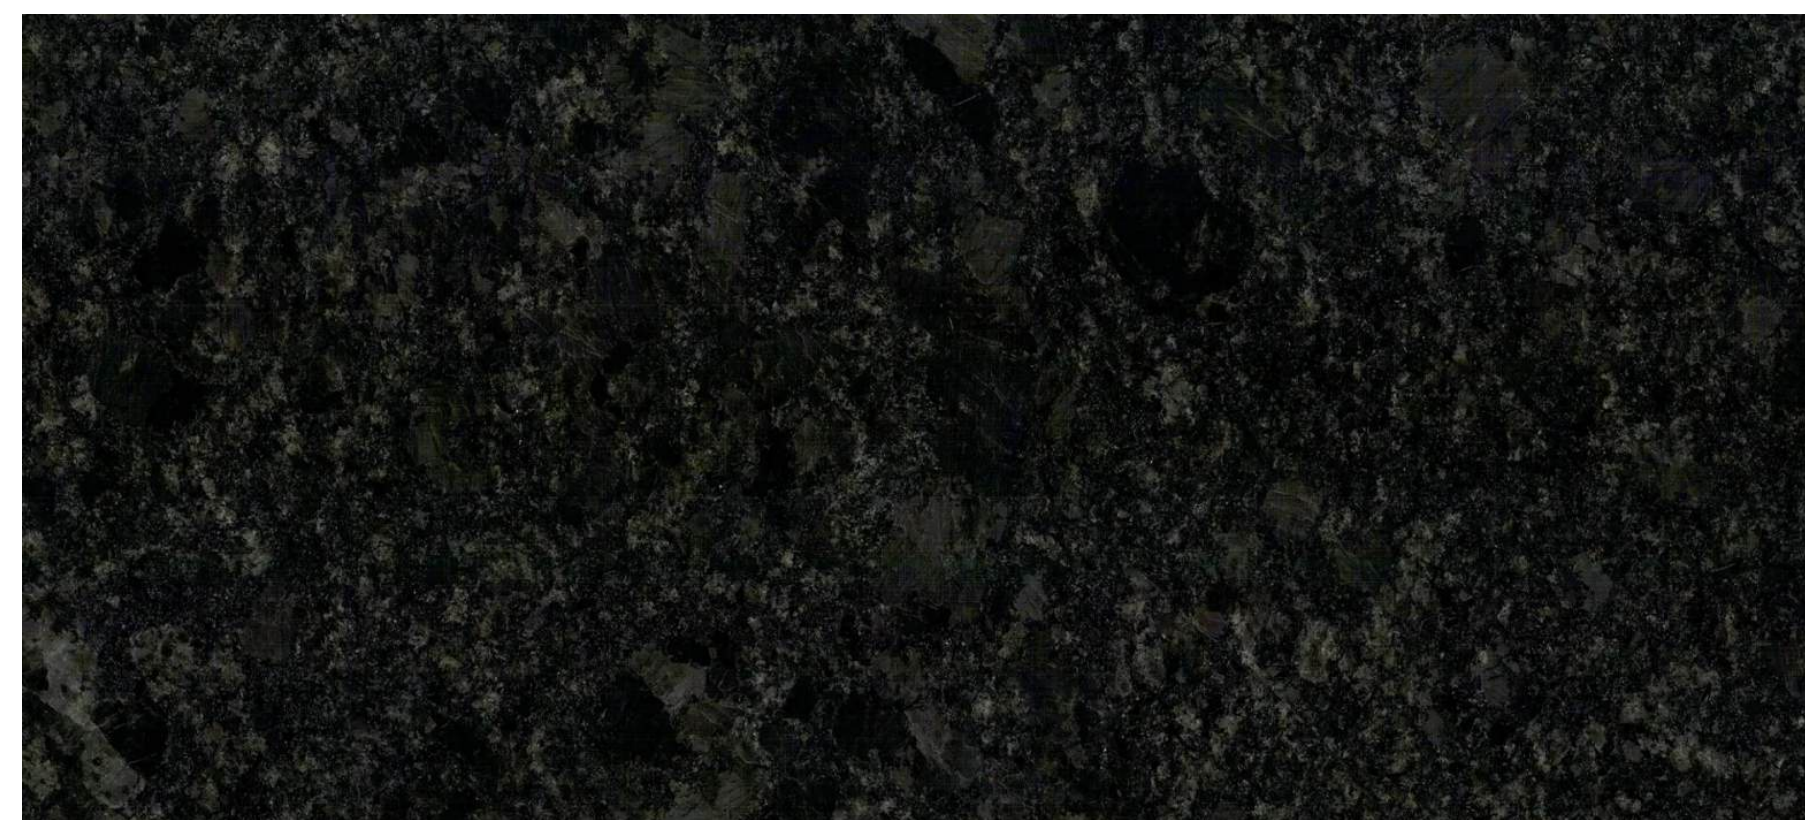

MATERIAL SELECTION

Steel Grey Granite is a natural stone with rich tones of grey and black, offering a timeless, rustic aesthetic that complements a wide variety of outdoor spaces.

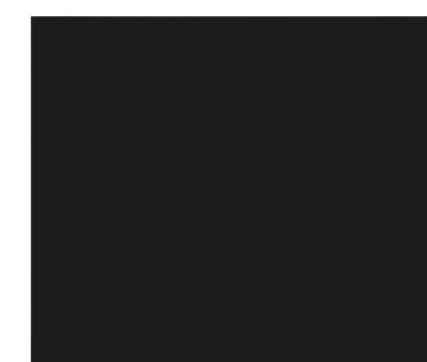

Ceramic stone is a high-performance, man-made material created by compressing and firing natural minerals and pigments under extreme heat and pressure.

Both materials are UV, heat, scratch, and stain resistant, making them exceptionally well-suited for long-term outdoor use.

INSTALLATION

Igneous offer a fully installed package. Let our installers take care of the build of your Outdoor Kitchen.

At Igneous, we have our own dedicated in-house installation crews, and to assist you in understanding what's necessary for your assembly to progress seamlessly, we've gathered these crucial points for you to keep in mind when mapping out your Igneous Outdoor Kitchen.

An Igneous Outdoor Kitchen requires a solid, hard-standing, or tiled patio, one that's level, flat and free from any debris. Igneous Kitchens come with adjustable legs, providing some flexibility for aligning your kitchen, however please note levelling your kitchen will not always be possible as in some case it will need to be installed with the fall of your patio.

Igneous Outdoor Kitchens are built from solid stone, to withstand the elements, including wind. Granite is heavy, so please check that your patio or hard standing is suitable for the weight. The weight of each module can be found on its respective page on our shop.

If you require services like water, gas, or electricity for your kitchen, please ensure these services and locations are predetermined, especially if they are coming up through the floor of your patio. Please note Igneous Outdoor Kitchens are unable to connect gas, electricity and water to your kitchen, ensure you have the relevant tradesman available.
